

Project#1

Project #1: Stock prediction

- Neural network approaches for stock prediction

助教嚴選

- Stock of this year: 6269 台郡 (Flexium)
- TA will provide historical data of:

1. Opening price 每日開盤價
2. Closing price 每日收盤價
3. Day high 每日最高價
4. Day low 每日最低價

for both
Flexium 台郡
and
Market 大盤

Important date

- Due on 23:59 March 28 (Sunday)

125.5
120.0
119.5
119.5
121.0

Please submit (via moodle)

1. **A text file** (student_id.txt) containing the **5**-day predictions (3/29, 3/30, 3/31, 4/01, **4/02***), one price per line
2. **A report** (student_id.pdf) summarizing your model design and implementation

Do **NOT** accept late submission.

Please start early!

* If closed, shift to the next day stock market opens.

For DL beginners

TA will provide an 1-hr tutorial on how to start this project next week. (3/10 11:00-noon)

Still, please start early!
